Event Press Release

NEW: Ontario Disaster & Emergency Management Conference to be hosted in Toronto

Toronto, ON - Diversified Communications Canada (DCC), a market leader in business events and online learning, is pleased to announce a partnership with the Ontario Association of Emergency Managers (OAEM), to produce a new conference that will serve the needs of Canadian emergency management professionals, to be delivered in Toronto, Canada, on October 3-4, 2018.

The World Conference on Disaster Management (WCDM), one of DCC's long standing franchises, has been a leading conference for the disaster management community, providing a unique combination of emergency management and business continuity education.

"The new emergency management conference will be more directly relevant to Ontario's CEMC's, plus emergency management professionals from the Red Cross, Public Safety and Social Services amongst others" said Mike O'Brien, OAEM President. "Experienced practitioners will help attendees promote safer communities, and cope with the many hazards that occur when disaster strikes".

"This is another natural shift for WCDM to better prepare and mitigate the vulnerabilities our local communities face with all too common disasters," said Dan Joyce, VP Business Development, DCC, "the Program will be packed with renowned keynotes, three concurrent streams of education and include workshops, a disaster management exercise plus webinars."

More details on the *Ontario Disaster & Emergency Management Conference* will be announced by DCC and OAEM in the very near future.
